

Supply Chain Protection

Reduce the risk from supply chain leaks

Protecting data across your supply chain is tough - Digital Risk Protection can help

These days, your data exists in an extended digital supply chain. You have reduced control over security measures, but you are still responsible for its safety. Data loss is inevitable. Attacks to your supply chain come in many forms through suppliers and 3rd party web applications.

Businesses suffered twice as many supply chain cyber attacks in the first six months of 2021 than the whole of 2020 according to the European Union Agency for Cybersecurity (ENISA)¹. It's research also showed that 66% of suppliers suffering an attack were either unable to say how it had happened or did not provide transparency to businesses affected.

Digital Risk Protection can provide vital early warning of data leaks, threats to your supply chain and attack planning. Taking action sooner can prevent follow-on attacks including fraud and phishing campaigns.

Share data with suppliers and web applications with confidence

You can quickly and easily identify data breaches and their source with 24/7 automated monitoring of the surface, Deep and Dark Web. Additionally, techniques like BreachMarkers can help you identify customer data breaches across your supply chain.

Supply chain protection from Skurio

Service benefits

- Know when a data leak has occurred
- Identify the source of the data leak
- Reduce the risk and damage from customer data leaks
- Identify if data could be exposed on the Dark Web
- Prevent your data from being weaponised against you
- Detect threats that could affect your supply chain

Data breach detection techniques

- Use pattern matching to detect data with regex markers
- Insert BreachMarker synthetic identities to watermark your data
- Use continuous surface, deep and Dark Web data monitoring
- Monitor for data strings specific to your business
- Use data fingerprinting to detect customer data securely
- Search for anonymised data at scale

Platform features

- Search our historical breached data
- Create alerts for all types of customer data breaches
- Proactive monitoring for supplier keywords
- Select and filter data sources to limit false positives
- Detect typosquatting domains for your brands and products

Get the help you need

Analyst Services

Create a tailored solution by combining our automated breach detection platform with analyst services*.

Digital Risk Health Check

See your business from a hacker's perspective to identify and understand vulnerabilities and potential threats. Our team will research exploitable information and any indicators of intent that could affect your company or data shared with direct suppliers or applications you use. This will help your team implement proactive security measures. The Skurio analyst team provide an overarching Open-Source Intelligence (OSINT) report compiled using the Skurio platform in conjunction with custom research activities.

Discover Skurio Digital Risk Protection Use Cases:

PROTECT YOUR STAFF

- Monitor for breached credentials around the clock and stop account takeovers
- Detect personal data breaches for staff
- Know if your VIPs are being targeted by bad actors

PROTECT YOUR INFRASTRUCTURE

- Discover if your IP addresses are posted on hacker forums
- Find out if 3rd party applications have been breached
- Monitor for targeted attack planning

PROTECT YOUR CUSTOMERS

- Scan for breaches of customer data
- Protect your data sets using Skurio's BreachMarker synthetic identities
- Monitor for leaks across your supply chain

PROTECT PRODUCTS & SERVICES

- Monitor Dark Web market places for sales of your products or counterfeit goods
- Detect unauthorised publication of intellectual property or digital content

PROTECT YOUR BRAND

- Monitor for Typosquatting incidents with up-to-date domain registration info
- Scan for mentions of your business that could harm your reputation

MARGIN THREAT PROTECTION

- Stop revenue leaking from promotion abuse by monitoring for shared hacks
- Learn if customers are sharing ways to get your services cheaper and close contract loopholes
