

# OUR TOP 5 CYBERSECURITY PREDICTIONS FOR 2023

# REMOTE WORKING IS NOT GOING AWAY...

IT and security leaders must develop security strategies that assume remote working is here for the long haul

**LEADERS CONTINUE TO  
PRIORITISE DIGITAL  
TRANSFORMATION & CLOUD**

Security leaders must support businesses to expand transformation plans by enabling them to manage risk effectively

# THE SUPPLY CHAIN WILL BE YOUR WEAKEST LINK IN 2023

Organisations that can manage security assessments and ongoing monitoring for 3rd party providers efficiently are more likely to avoid incidents next year

# THE HUNT CONTINUES TO BRIDGE THE TALENT GAP

IT and security leaders will look to outsource more of their cybersecurity defences to managed service providers to solve this

**HACKERS WILL CONTINUE TO  
OUTSMART BUSINESSES WITH  
THEIR OWN AUTOMATION**

Automation means attacks can be  
mounted at scale, putting more  
businesses in the crosshairs
