

SKURIO SUCCESS STORIES

CREDENTIALS BREACH

Password reuse

CREDENTIALS BREACH

Situation

A Skurio customer received a notification from the Skurio DRP platform that included their corporate email address within a stealer log.

CREDENTIALS BREACH

Task

The Skurio Intelligence Analyst team were tasked to determine if the information within the notification posed a threat to the customer.

CREDENTIALS BREACH

Action

The team analysed the breached content and was able to determine the corporate email address had been used on third party services and password reuse was in operation.

CREDENTIALS BREACH

Result

Skurio's customer identified a breach in their policies and introduced additional education and training for their employees about the use of corporate entities on third party services.
