## INCIDENT RESPONSE

Data Breach

# INCIDENT RESPONSE

## Situation

An Australian IT Consultancy contacted Skurio suspecting that a threat actor had gained unauthorised access to their systems.

# INCIDENT RESPONSE

## Task

The analyst team were tasked to identify if there was any historic indication that they were being targeted, and to verify if the unauthorised access resulted in any data exfiltration.

# INCIDENT RESPONSE

## Action

We conducted a review of all historical posts relating to the impacted company within the Skurio database. No indication or warning of an attack were identified.

# INCIDENT RESPONSE

## Action

We created alerts on our  
DRP platform to monitor in  
real time any mentions of  
the business and potentially  
sensitive information.  
Notifications were analysed  
and Intelligence Reports  
produced.

# INCIDENT RESPONSE

## Action

We received a notification, originating from a hacking forum that the victim's unauthorised access had resulted in exfiltration of sensitive information. Skurio harvested all available breached information.

# INCIDENT RESPONSE

## Result

Our Intelligence Report allowed the customer to review the breached information to determine the sensitivity and put measures in place to mitigate future threats against individuals included in the breach.
