

SKURIO SUCCESS STORIES

STEALER LOGS

Corporate email breach

STEALER LOGS

Situation

A Skurio user received a notification from the Skurio Digital Risk Protection platform indicating a mention of their corporate email address and corporate website link.

STEALER LOGS

Task

The Skurio Intelligence Analyst team were asked to determine if the information within the notification posed a threat to the customer.

STEALER LOGS

Action

The team analysed the breached content and determined that there was a clear text password.

STEALER LOGS

Result

We informed the customer there was a tangible threat to their systems through the exploitation of the breached clear text credentials.

The user was able to mitigate the threat by doing password resets.
